

VYTAL HOUSE BRD

Business Requirements Document

Platform scope | June 19, 2026 | Draft for stakeholder review

Goal

Launch a full-stack VYTAL House platform that supports marketing, lead capture, booking interest, vendor procurement, internal operations, source-backed planning, and quality-gated launch control.

In Scope

- Public website for brand, services, memberships, facility concept, and contact.
- Member app surface for seeded bookings, session requests, education, and membership context.
- Admin dashboard for launch readiness, quality scoring, leads, bookings, vendors, content, and documents.
- Vendor CRM with procurement status, contact records, quote stage, and outreach template storage.
- Notion-ready Markdown/CSV importables and Figma-ready tokens/assets.
- Firebase-ready security rules, indexes, storage rules, and governed seed data.

Out of Scope Until Approval

- Live payment processing.
- Live vendor email sending.
- Protected health information collection.
- Legal filings or state portal submissions.
- Live Notion or Figma workspace creation.

Governed Data Model

Every database-like record uses the required fields id, entity, type, name, status, owner, and updatedAt. Domain payloads are stored in metadata.

Collection	Purpose	Primary Role	Required Gate
members	Member profile and membership state	member	No PHI without approval
bookings	Booking interest and operational scheduling	operations	Audit event required
services	Source-backed service catalog	clinical	Claims review
vendors	Vendor pipeline and procurement	operations	No sending without approval
contentItems	Website and wiki content	marketing	Brand isolation review
socialPosts	Social calendar	marketing	Claims review
leads	Interest capture	admin	No sensitive medical data
documents	Controlled artifact register	admin	Professional review tags
auditEvents	Governance event trail	admin	Append-only pattern
qualityScores	Pre-run quality gate	owner	Minimum 97/100

Role and Route Matrix

Surface	Allowed Roles	Controls
Public website	owner, admin, marketing, operations, member	Read-only content and lead form
Member app	owner, admin, member	Prototype booking interest only
Admin dashboard	owner, admin, operations	Quality and launch readiness only
Clinical review	owner, clinical	Protocol and claims governance
Vendor CRM	owner, admin, operations, vendor	No outbound email mutation
Content calendar	owner, admin, marketing	No unreviewed clinical claims

Functional Requirements

- Users can browse services, memberships, facility zones, and source-backed reference content.
- Leads can submit interest through a safe endpoint with no medical intake fields.
- Members can view seeded bookings and request booking interest.
- Admins can scan quality evidence and operational readiness records.
- Operations can manage vendor quote stages and source notes.
- Marketing can manage social posts and content readiness.

Non-Functional Requirements

- VYTAL-only brand isolation.
- Responsive desktop and mobile UI.
- Accessible contrast, keyboard-friendly controls, and no known text overlap.
- No unreviewed clinical, legal, or financial claims.
- Build, typecheck, render, and quality gate evidence must be stored locally.
