

VYTAL HOUSE

Recharge. Recover. Evolve.

Full Manifest Dossier | Local Draft Package | June 19, 2026

Executive Control Summary

VYTAL House is structured as an isolated recovery and wellness club package with source-backed planning, governed data records, local-first artifact outputs, and explicit gates for legal, medical, financial, vendor, payment, Notion, and Figma actions.

- Brand is locked to VYTAL House, the tagline Recharge. Recover. Evolve., and owners Chauncey Gardner and Kathy Ha.
- The software MVP uses Next.js, React, Firebase-ready rules, seeded records, and safe prototype forms.
- The operating package includes Notion importables, Figma tokens, vendor outreach, social calendar, source manifest, and delivery manifest.
- The quality gate requires a score of at least 97/100 before runtime handoff.

Membership Baseline

Tier	Monthly Price	Projected Members	Projected MRR	Role
Core	\$299	150	\$44,850	Entry recovery access
Elite	\$599	100	\$59,900	Unlimited recovery and IV/NAD+ credit
Black	\$1,499	50	\$74,950	Concierge wellness and diagnostics

Service System

Service	Purpose	Gate
Hyperbaric Oxygen Therapy	Anchor clinical recovery modality	Clinical review
IV and NAD+ Lounge	High-touch lounge treatment flow	Medical director review
Red Light Therapy	Photobiomodulation and recovery	Protocol review
Cryotherapy	Cold exposure recovery lane	Safety review
Sauna and Cold Plunge	Thermal contrast suite	Operations review
Float and Dry Float	Restoration and stress relief	Operations review

Separation of Duties

Role	Can Own	Cannot Do Without Approval
owner	Final launch gates	Bypass professional review
admin	Platform and quality evidence	Collect protected health data
clinical	Medical protocols	Publish legal or financial claims
operations	Vendors and booking readiness	Send vendor messages without approval
marketing	Content and social calendar	Make clinical claims
vendor	Own quote responses	Access member data
member	Own booking interest	Access admin surfaces

7-Field Schema

Every database-like object must include id, entity, type, name, status, owner, and updatedAt. Domain payloads live under metadata.

Source and Compliance Notes

- Vendor and modality claims are anchored to source URLs listed in docs/01_SOURCE_MANIFEST.md.
- Maryland entity formation details require SDAT/Business Express review before filing.
- HHS HIPAA guidance is treated as a privacy reference; no PHI is collected in the prototype.
- The CAD package is conceptual only and requires architect/engineer conversion before permits.
